This is a daily activity throughout the year. In this, online competitive exam guidance is provided to the students every evening from 5 to 7 pm. Students taking admission in first year colleges are included in this. The overall syllabus is divided into four sections. For the first three months, there are classes on the subject of MPSC. It provides information about all competitive exams under MPSC. We runs the course PSI STI Assistant in MPSC continuously for three months daily. In the second three months, hours are taken on the UPSC syllabus. Information about all the posts under UPSC is given at the beginning. How is the exam pattern? What is the full syllabus? What is the full syllabus? It is informed that based on the syllabus for the pre-UPSC exam, the hours will run continuously for three months.

In the third trimester, the students are given complete information about the recruitment in the banking sector. Who conducts exams for which posts in banking sector? How is the exam procedure for that? What is the full syllabus? It is informed and conducted continuously for three months based on actual syllabus.

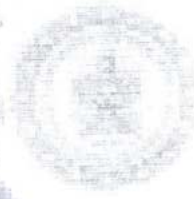

In the fourth trimester, hours are spent on staff selection. Which exams are covered under Staff Selection Recruitment? What is its course? How to prepare for those exams? This information is provided at the beginning. And classes are organized based on this syllabus continuously for three months.

If the students who take admission in the first year do all these hours regularly, then the student gets a definite idea of the fields in which he can pursue his career. And that student tries in second and third year to prepare for that particular career. This is the main objective of this activity.

In the 2nd and 3rd year the student is provided hours to prepare for any field of their choice be it MPSC or UPSC or Banking or Staff Selection.

For those students who want to set up their own industry or business, the Career Katta department conducts the Entrepreneur Visit program. In these activities, students are given information about an industry every evening from 6 to 7 p.m. This information is given through successful entrepreneurs who are doing their own industry and business at the national level. In this, the entrepreneurial experiences while setting up the industry are told. How to gather the information needed to set up a business? How to raise capital for business? How do banks help us? What are the schemes of the government for small and medium enterprises? How to market your product? In this regard, information about new industries is given every day for 365 days.

A student who constantly learns about different industries for 365 days, creates a business of his own in his mind. And while studying in college, he turns to his own business. This is the main objective of this activity

Every student studying for the competitive exam has to read different newspapers to prepare for General Knowledge and Current Affairs. But not all these newspapers are available to every student every day. Also, students waste a lot of time in searching and reading the component required for the competitive exam in that newspaper. Also the new students do not have the knowledge of which component they should read. Time of students should be saved and they should get accurate information. For this, a fifteen to twenty minute news program is organized every day. After listening to this program, the students get the required amount of information from all the newspapers together.
